

DRONE POLICY

MSTCA prohibits the use of Drones at any of our competition sites or meets. The prohibition applies to all fields of play including the spectator stands and parking areas. We reserve the right to follow this policy. All proper officials can remove any person from the site who refuses to follow this policy.

TEAM TENT POLICY

All tents used at an MSTCA event must be **properly secured** as to avoid the tent from flying in a high wind. Securing should mean that the tent is **a. staked properly**; and **b. secured to a fence when available or use weighted bags when available**. In very high winds, tents should be lowered to a lower height!

We reserve the right to ask coaches to lower tents that are not properly secured and/or weighted down and can ask that the tents be removed from the site when it is determined to be a “safety” issue for all involved.
